

OntoGuard Refusal / Escalation Receipt

Public sanitized one-page proof of boundary behavior

Verdict: ESCALATE **Release Authorized:** False **Business Effect:** Autonomous release withheld pending review.

Field	Value
Scenario	Synthetic insurance claims denial rationale
Why the output looked usable	Professional, fluent, and operationally plausible language
Why it was not allowed to proceed autonomously	Customer-impacting decision with incomplete evidence linkage and insufficient policy support
Required next step	Claims/compliance human review before approval, rewrite, block, or request for more evidence
What this proves	OntoGuard can stop or escalate a plausible AI output before business consequence

Reason codes

- CUSTOMER_IMPACTING_DECISION
- HIGH_DOWNSTREAM_RELIANCE
- EVIDENCE_LINKAGE_INCOMPLETE
- POLICY_SUPPORT_INSUFFICIENT_FOR_AUTONOMOUS_RELEASE
- HUMAN_REVIEW_REQUIRED

The source code and protected runtime internals are not included. The public proof surface is the behavior, verdict, receipt, artifact package, and generated packet.
